General Notice No. 119 of 1999.

THE UGANDA NATIONAL BUREAU OF STANDARDS ACT, 1983.

(ACT No. 1 OF 1983).

NOTICE.

DECLARATION OF NATIONAL STANDARDS.

Section 14 (1).

IT IS HEREBY NOTIFIED for general information that the National Standards Council with the approval of the Minister responsible for trade and industry and in exercise of the powers conferred upon the Council in subsection (1) of section 14 of the Uganda National Bureau of Standards (UNBS) Act, 1983 hereby declare that the Standards specification for Y2K Compliance definition, which appears hereunder is a Uganda National Specification, and may be viewed and obtained, at a fee, at the UNBS, Plot M217 Nakawa Industrial Area.

Please also note that the Minister, on the recommendations of the Council, intends to declare the Standard Specification Compulsory for national use after the prescribed 2 months of this notice. All persons interested or likely to be affected by this action are advised to lodge their objections to the Council in writing before the expiry of this period from the date hereof.

US 61: 1999

UGANDA STANDARD: STANDARD SPECIFICATION FOR 2YK COMPLIANCE TERMINOLOGY

Foreword

This standard specification has been prepared to complement the standard ISO 8601 'Data elements and interchange formats' by defining the meaning of Y2K compliance. Y2K compliance is an issue of fundamental importance to the operation of business and affects all business processes from delivery of goods and services to invoicing, stock control, warehousing and all financial systems, without time-dependent problems.

The Specification

Definition "Year 2000 (Y2K) Compliant" shall mean that in any software/hardware/firmware/equipment and or system with embedded micro processors, neither performance nor functionality shall be affected by dates prior to, during and after the Year 2000 and the software/firmware/hardware/ equipment and or system has the ability to process, manage and manipulate data involving prior to, during and after the calendar year 2000 including leap year calculations and other high risk dates and or timings, without error relating to date data, faulty performance, abnormal endings, loss of functionality or invalid or incorrect results. Further, the software/firmware/hardware/equipment or

system with embedded processors provide that all date related interface functions and data fields include the indication of century and in particular, that:

- No value for current date will cause any interruptions in normal functions.
- That date and time based functionality must behave consistently for dated prior to, during and after the Gregorian Year 2000 i.e. dates outside the range 1900-1998 including the years 1900, 2000 and thereafter encountered and or processed by the software/firmware/hardware/ equipment will be correctly recognised, calculated, sorted, stored, displayed and or otherwise processed in any level of computer software/firmware/hardware/equipment including but not limited to microcodes, application progress, system software, utilities, files and database.
- That in all interfaces and data storage, the century in any date and representation must be specified either explicitly or by unambiguous algorithms or inferencing rules.
- The Year 2000 must be recognised as a leap year just as other leap years must also be recognised as such.

APPROVED this 29th day of April 1999.

DR. E. KASIRYE-ALEMU,
Secretary, National Standards Council.

BRIG. MOSES ALI,
*2nd Deputy Prime Minister and
Minister of Tourism, Trade and Industry.*
